The background of the slide is a collage of wood textures. The top-left corner features a vertical strip of dark, rich brown wood with a fine, straight grain. The middle section is dominated by a large, horizontal plank of dark brown wood with a prominent, wavy grain pattern and several knots. The bottom-left corner shows another vertical strip of dark brown wood with a similar fine grain. The right side of the slide is a solid, light beige color, providing a clean background for the text.

CONSIGLI PER LA POSA

POSA A CORRERE - La posa a "correre" necessita una maggiore premura nelle fasi di livellaggio e accostamento dei singoli pezzi, per poter attenuare eventuali differenze di planarità.

Sebbene inevitabili queste piccole differenze non compromettono un buon risultato finale: dunque è consigliato sfalsare i singoli pezzi di 15-20 cm massimo.

IMPORTANTE - La posa sfalsata al 50% non è consigliata. Trattandosi di materiali ceramici si suggeriscono le seguenti pose:

FIXING ADVICE

PARALLEL FIXING - To minimize differences in the flatness of the tiles, "parallel" fixing requires greater attention when the individual tiles are positioned and levelled.

Although these small differences are inevitable, they will not spoil a good final result: the individual tiles should thus be staggered 15-20 cm at most.

IMPORTANT - Please note that fixing in a 50% staggered configuration is not recommended. We suggest the following fixing configurations for these ceramic materials:

CONSEILS DE POSE

POSE A FOND PERDU - La pose à "fond perdu" nécessite une très grande attention dans les phases de nivellement et d'assemblage des différentes pièces, de manière à atténuer les différences éventuelles de planéité. Ces petites différences sont inévitables, mais ne compromettent pas un bon résultat final: il faut donc décaler les différentes pièces de 15-20 cm maximum.

IMPORTANT - A pose décalée à 50% n'est pas recommandée. Pour les matériaux céramiques nous conseillons les poses suivantes:

TIPPS ZUR VERLEGUNG

FORTLAUFENDE VERLEGUNG - Die fortlaufende Verlegung (eine Platte nach der anderen) erfordert mehr Sorgfalt beim Ebenen und Anlegen der einzelnen Teile, um eventuelle Ebenheitsunterschiede zu mindern. Obwohl sie unvermeidlich sind, stellen diese kleinen Unterschiede keine Beeinträchtigung des guten Endergebnisses dar:

Es ist deshalb ratsam, die einzelnen Teile um max. 15-20 cm zu versetzen.

WICHTING! - Die um 50% versetzte Verlegung nicht empfohlen ist. Da es sich um Keramikmaterial handelt, kann man die folgenden Verlegungen empfehlen:
